

IntelNett™ Wireless Alarm Management Solution for Hospitals and Sub-Acute Care Facilities

Great Clinical Solution

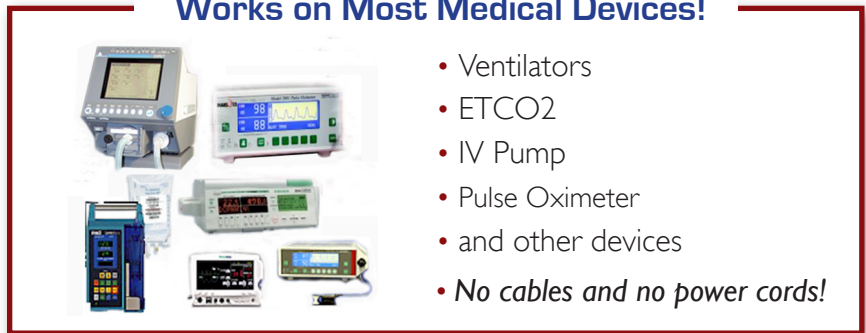

- Detailed alarm status and history reports by patient and medical device
- Improves nurse and staff productivity and situational awareness
- Scales from 24 to 256 medical devices per floor
- Increases patient safety and care
- Meets JAHCO Standards for National Patient Safety Goal # 6
- Alarm propagation via pager, email and other devices
- Centralized wireless alarm management for all clinical needs

Great alarm solution for:

- Risk Managers
- Nurse Managers
- Respiratory Care Managers

Works on Most Medical Devices!

- Ventilators
- ETCO2
- IV Pump
- Pulse Oximeter
- and other devices
- *No cables and no power cords!*

IntelNett™ is the Solution to the Changing Healthcare Market:

- PC based touch screen with customized floor plan
- Touch screen makes it easy to view, monitor and respond to alarms by room and device
- Wireless transmitters install and work on almost any system or medical device regardless of manufacturer
- Focuses nurses and staff to respond to specific problems or patient needs

Healthcare is Changing...

You're seeing more patients, the patient acuity is higher, you're managing more medical devices, you have a shortage of manpower and RESPONSE TIME is critical when alarms occur - IntelNett™ solves these problems and more!

Redundant Device Alarm Verification System

- Audio & visual alarms
- Scalable up to 256 medical device
- Modular in design, easy to expand
- Open wireless architecture works with most any system or medical device

Improves Administration

- Meets building code compliance
- Decreases litigation exposure
- Lowers operational cost
- Helps to relieve family stress levels for patients whose medical devices are in alarm

IntelNett™ Wireless Alarm Management Solution for Hospitals and Sub-Acute Care Facilities

Hospital Wide Wireless Alarm Management Solution Extends Beyond Clinical Applications

- Egress, motion detectors & video surveillance controls
- Refrigeration & blood bank temperature monitoring
- Enhance nurse call systems
- Manage and document any dry contact alarm
- Tamper sensors and panic buttons
- Asset tracking
- Infant security

Plug & Play! - Easy to Install, Maintain, Operate and Expand

PC Based Central Station:

- Touch screen makes it easy to view and manage alarms at nurse station
- Access Alarm Management Reports
- Touch Screen Provides Ease of Operation

900 MHz Wireless Transceiver Set:

- Small Transmitters attach to most systems and medical devices
- Self Supervision System
- 2 Year Battery Life (Approximately)

Wireless Installation:

- No Costly Infrastructure to Install
- No Costly Infrastructure to Maintain
- No Costly System Expansion

IntelNett™ wireless transmitters utilize 902 MHz to 928 MHz frequency spectrum. This spectrum has been approved by the FCC for use in commercial and health-care environments.

IntelNett™ allows you the ability to essentially be in several places at the same time without losing valuable time within your unit or facility.

IntelNett™ can assist with meeting JCAHO's National Patient Safety Goals Number 6: "Assure that alarms are activated with appropriate settings and are sufficiently audible with respect to distances and competing noise within the unit."

IntelNett™ provides increased patient safety, documentation and situational awareness.
